

Submission By: Zarrar Malik, 3rd September 2022

AWS Cloud Intro:

AWS Services:

- Compute
- Storage
- Network Security
- Blockchain
- ML
- AI

Client-Server Model: The customer makes a request for the server to respond to that request

Amazon EC2 (Virtual Server)

Pay for what you use, no prepay, pay for what you need.

AWS Cloud Computing: on-demand delivery, IT resources, Over the internet

AWS Cloud Benefits:

- Cost savings
- Security
- Scalability
- Flexibility

Most of the information is similar to the info in the previous files, hence to avoid repetition I have kept this file fairly brief
